

RN Risk Management/Infection Control:

Job Description:

We are currently hiring an RN Risk Management/Infection Control position. Looking for an RN with an exceptional work ethic and a passion for infection and risk management. The ideal candidate for this position will have strong communication skills, an interest in continuing their education and the ability to work efficiently with a team.

Responsibilities include but are not limited to:

- Gathering and analyzing infection data to make evidence-based decisions
- Educating medical and public health professionals on infection prevention protocols to facilitate emergency preparedness
- Assisting with the development of action plans in case of a community outbreak to minimize the potentially devastating impact
- Collaborating with government agencies such as the CDC to ensure that infection control practices are implemented and enforced
- Studying pathogens to determine origin to prevent future outbreaks
- Identifying and analyzing various risks (e.g., business, financial)
- Developing risk management controls and contingency plans
- Communicating recommendations to management
- Acts as a clinic representative in supplying and reporting appropriate documentation

Qualifications:

- Bachelor's Degree in BSN, Insurance, Risk Management, Healthcare Administration, or related field.
- Or directly related work experience.
- Iowa Registered Nurse License
